BTI Study Objective

Recommend one or more strategies for rapid (2 year) penetration of the U.S. market for private network services (design, implementation, operation, and field support).

Project Scope

- Market Forecasts
- Product and Service Overviews
- Required Product Support
- Customer and Vendor Requirements Definition
- Vendor Profiles
- Market Penetration Requirements

Deliverables

- *Network Management User Requirements* Report
- Preliminary Draft Presentation for BTI Review
- Presentation (Interim/CA, Final/London)
- Written Report

BTI Study Characteristics

Our Experience:

- Very Challenging Project
- Private Network Market Has Many “Faces”
- Language/Terminology Not Fully Established
- Some Patterns Emerging
- Dynamic Changes Occurring

INPUT

INPUT Research Team

Project Manager: Denny White
Director, Custom Research

Four Senior Personnel: Alex Graham
Buddy Stigler
Marc Matheson
Denny White

Five Research Analysts

Project Locations: Mountain View, CA
Parsippany, NJ

Executive Review: Bob Goodwin
Vice President, Research

Peter Cunningham
President

DENNIS WHITE
Director, Custom Research
INPUT

Capabilities:

- Nineteen years experience
- Marketing and business strategy development, mergers and acquisitions
- Twelve vertical markets
- Venture capital startups, turnaround situations, medium-size public companies, and a Fortune 100 company

Background:

- Director of Marketing for Boole & Babbage, Inc.
- Director of Marketing for Syntelligence, Inc.
- Vice President Marketing for Tymshare INSG
- Vice President Marketing for Tymnet
- Manager Strategic Planning for Tymshare
- Manager Business Planning for McDonnell Douglas Automation

Education:

- BS Engineering, Northwestern University
- MBA, Washington University (St. Louis)

ALEX GRAHAM
Principal Consultant
INPUT

Capabilities:

- Over 20 years in telecommunications
- Planning and Marketing positions
- Voice and data
- Network Management
- System Development

Background:

- General Manager of International Consulting Firm
- Senior Consultant at Arthur D. Little
- General Manager VISA International

Education:

- BA Business, Grove City College
- MA International Management, American Graduate School

H.W. (Buddy) STIGLER
Manager, Customer Service Program
INPUT

Capabilities:

- More than 39 years in diversified IBM career
- System installation, maintenance, and software support
- Competitive analysis, needs evaluation, customer satisfaction

Background:

- Director of Planning, Measurements, I/S, Staff Services, Offerings and Special Bids

Education:

- B.S.E.E., Mississippi State
- M.S. Industrial Management, MIT (Sloan Fellowship)

—INPUT—

MARC MATHESON
Principal Consultant
INPUT

Capabilities:

- 21 years in implementation and management of voice and data networks
- Telecom project planning and system design, installation and trouble shooting
- WANs and LANs

Background:

- Manager—Network Engineering for Quotron Systems
- Communications Manager for ITTEL (including resale activities)
- Network Supervisor for VISA

Education:

- Business Administration, California State University

Interim Meeting Objectives

1. Review Status
2. Validate:
 - Approach
 - Depth/Breadth of Coverage
 - Presentation Formats
3. Consensus on Items Required to Complete Project
4. Set a London Presentation Date

Meeting Style

1. Informal Working Session
2. Different Perspectives = Different Opinions
3. Project Is Not Finished—Some Incomplete Results
4. Participate in Discussion; Help Us Focus the Effort
5. "Marbles..." Use It to Keep Discussion Productive and on Track!"

I. Project Overview and Status

A. Accomplishments to Date:

- 1. User Interviews (35) and Preliminary Analysis**
- 2. Market Forecast Data Collection**
- 3. Product/Service Overviews**
- 4. Required Product Support**
- 5. Preliminary Strategy Scenarios**
- 6. Sample Vendor Profiles**

B. Balance for Completion:

- 1. BTI Feedback and Confirmation**
- 2. Do Any Rework Required**
- 3. Finalize Strategy Scenarios**
- 4. Do Vendor Profiles**
- 5. Develop Final Report & Presentation**
- 6. London Presentation**

SCHEDULE (Q1-1989)

INPUT®

DECEMBER

| Final Presentation London 2/28/89 | | | | | | | | | | | | | | | | | | | |

Name of Individual: D.G. White

Dept./Program: BTI

Date: 12/7/88

Definitions

Private Networks - Combinations of transport services (lines) and equipment dedicated to the use of a single unique organization. Sometimes used to refer to lines only.

Network Management - The job of running networks, including network design, implementation, operations, and repair/maintenance. Also, a product or service that identifies, diagnoses, and specifies corrective action for network problems.

Field Service - Customer Service; Repair and Maintenance.

Network Design - Technology selection, architecture/structure, capacity planning.

Network Implementation - Planning, scheduling, ordering, installing, and testing lines and equipment.

Network Operations - Monitoring, problem management, network administration.

Network Repair and Maintenance - On- or off-site repair and maintenance of network facilities.

II.1 User Survey Results

Exhibit II-1

User Survey Sample Characteristics

1. Diverse Regarding Industry and Size of Firm
2. Emphasis on Middle Range of "Large" and "Medium" Size Organizations (\$200 M to \$4 B Sales)
3. Good Balance between Leading Edge (39%) and Middle of the Pack (45%) Users; 15% Were Laggards
4. 95% of Network Resources inside U.S.A.
5. Nationwide Networks (60%) vs. Regional (40%)
6. Most (70%) Have Multiple Special-Purpose Networks (Avg. 3 per Organization) Rather than a Single Integrated Network

EXHIBIT II-2

**USER SURVEY
SAMPLE DISTRIBUTION BY INDUSTRY**

User Survey Organizations Interviewed

Very Large (>\$4B) like "Fortune 100"

- *1. PG&E
- 2. McDonnell Douglas (Discrete Mfg.)
- 3. TransAmerica Corporation (Insurance)
- 4. Unisys (Discrete Mfg.)

Large (\$500M-4B) like "Fortune 100 to 500"

- *1. Del Monte (Discrete Mfg.)
- 2. Nabisco/Confection Division (Process Mfg.)
- 3. Church of Jesus Christ of Latter Day Saints
- 4. Navistar Financial (Financial)
- 5. American Express Travel (Financial)
- 6. Crowley Maritime (Transportation)
- 7. Intel (Discrete Mfg.)
- *8. Mervyns (Retail)
- 9. World Savings (Fin.)
- *10. Amdahl (Discrete Mfg.)
- *11. Raley's (Retail)
- 12. Brueners (Retail)
- 13. United Fruit (Growers and Real Estate)
- 14. Phelps Dodge (Mining)

* On-Site Interviews

Exhibit II-3 Cont.

User Survey Organizations Interviewed

Medium (\$200-500M)

1. SRI International (Services)
2. CA Department of Fish and Game
(State and Local Government)
3. First Security Bank (Financial)
4. Blue Cross of New York (Insurance)
5. Quotron (Services)
6. Iron Oak Supply (Wholesale)
7. Data Products (Discrete Mfg.)
8. Allied Signal (Discrete Mfg.)
9. Kaiser Engineers (Services)
10. Simplex Time Recorder (Process Mfg.)
11. Oregon Bank (Fin.)
12. S.F. Federal Savings and Loan (Fin.)

Small (\$50-200M)

1. Good Samaritan Hospital (Medical)
2. University of San Francisco (Education)
3. On-Line Business Systems (Services)
- *4. Delta Dental (Insurance)
5. Specialty Brands (Process Mfg.)

* On-Site Interviews

User Questionnaire

1. 12 Pages Long
2. Over 300 Response Fields
3. Captured Narrative as well as "Hard" Responses
4. Covered:
 - Network Demographics
 - Experience with
 - Design
 - Implementation
 - Operations
 - Repair & Maintenance
 - Future Outlook in Same Four Areas
 - Reaction to Proposed Offering
 - Knee Jerk
 - Likes/Dislikes
 - Alliances
 - Foreign Ownership
 - Acid Test

EXHIBIT II-5

USER INTERVIEWEE PROFILE

- Long Interview 50 Minutes +
- Most Only Partially Complete

Exhibit II-10

User Perceived Need for Network Repair and Maintenance Services

1. 93% Say It's Not a Problem

- Equipment Is Reliable
- Spares Are on Site
- Fed Express when Necessary

2. 78% Say Looking for Improvement in Field Services Is a Low Priority

"If It Ain't Broke, Don't Fix It!"

3. Most Feel Their Dealings with the Multivendor Environment Are Very Satisfactory...

- They Average 7 Vendors
- Probably Are Mentally Resigned to This Situation

Exhibit II-11

Where Are the Equipment Problems?*

| | <u>Network Equip.</u> | <u>Related Equip.</u> |
|----------------|-----------------------|-----------------------|
| Most Problems | Modems | PBXs |
| Least Problems | Muxes | PCs |

- * Small sample of respondents to this question plus wide variations in data suggest not taking these results too seriously.

Exhibit II-12

Who Is Providing the Service?

| | |
|-------------------------------------|------------|
| A. Equipment Vendors | 55% |
| Third-Party Maintenance Firms (TPM) | 10% |
| In-House Staff | <u>35%</u> |
| | 100% |

B. Strong Preferences

- 80% Use Two or More of the Three Sources
- Concentrations of 80% or Greater Field Service Work Were:

| | |
|---|----------|
| Equipment Manufacturer | 15 |
| TPM | 1 |
| In-House | <u>8</u> |
| Total Users with $\geq 80\%$ Concentration in One Field Service Source | 24 |

Exhibit II-13

Problem Resolution Satisfaction Levels

*- could be a competitive advantage
- real need (requires education)*

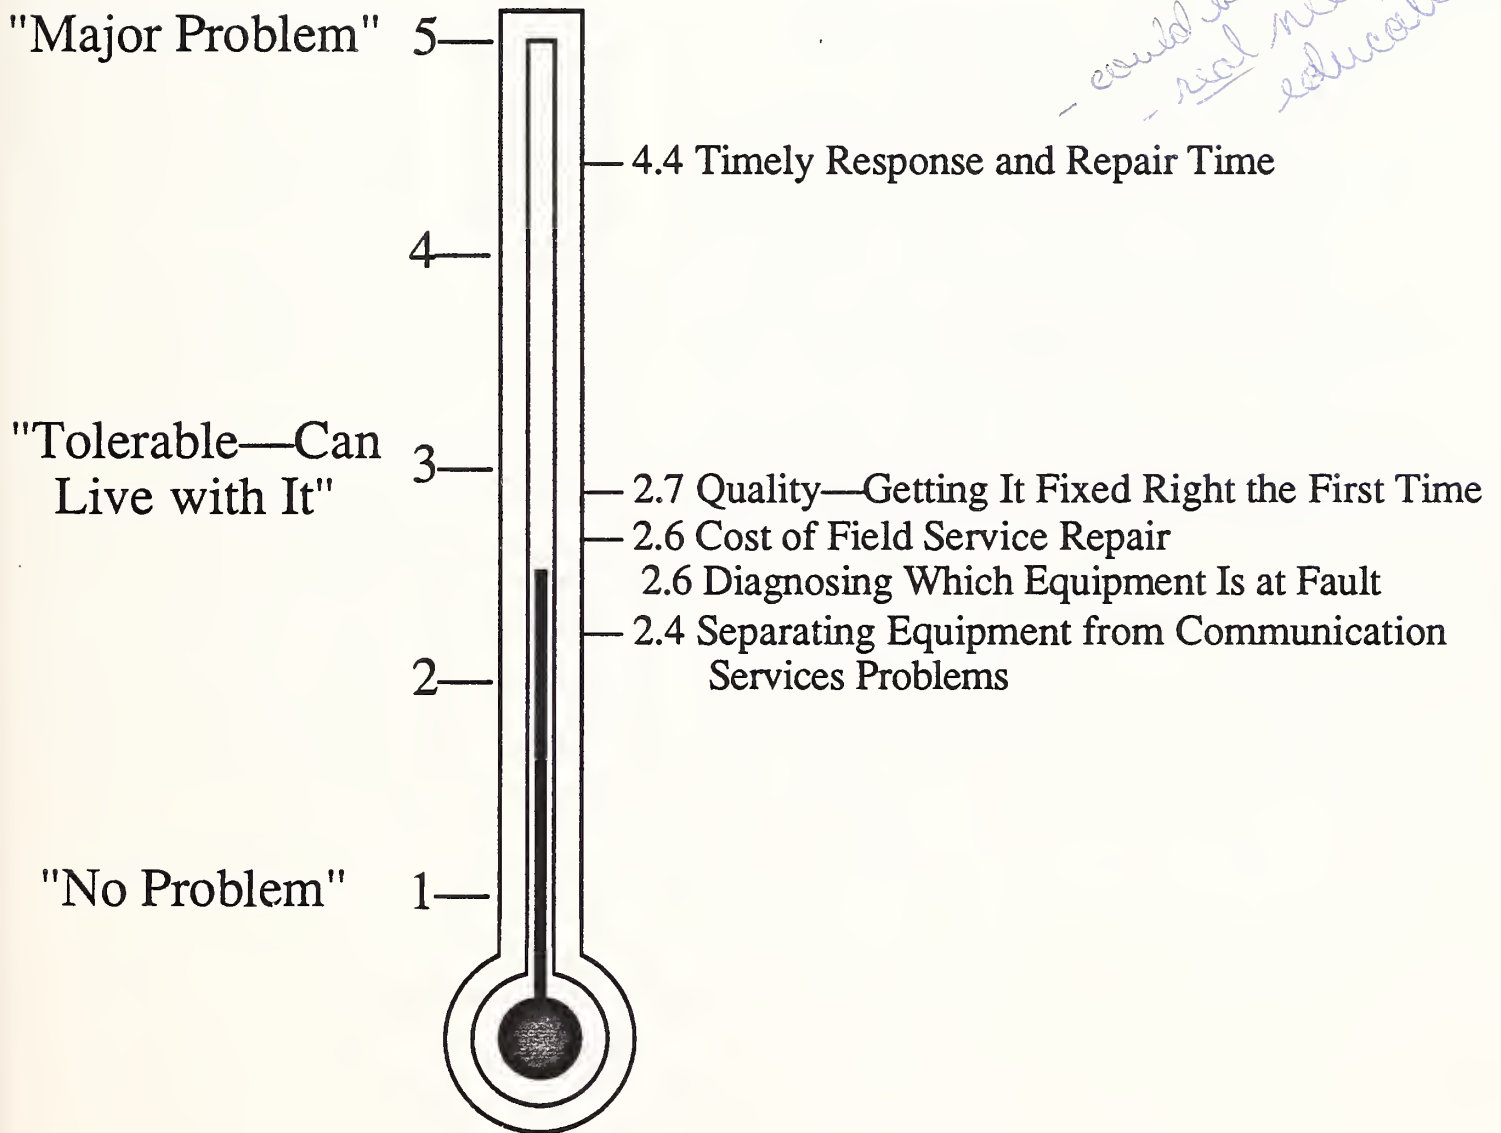

Exhibit II-14

Under What Circumstances Would You Put All Your Repair and Maintenance Business in the Hands of a Single TPM Firm? (Analysis of Narrative Comments)

| | |
|--|----|
| Would Never Consider This | 10 |
| • Too Much at Risk | |
| • Don't Want a Middle Man | |
| • Want Control | |
| • No One Could Do It Better than Us | |
| • Too Specialized | |
| • Not a Problem | |
| If Less Expensive, Given Same or Better Quality Service | 14 |
| Faster Response Time | 2 |
| Network Management Expertise | 1 |
| Already Doing This and It's Great! | 1 |

Exhibit II-15

Anticipated Problem Intensity Over Next Five Years

Exhibit II-16a

Knee-Jerk Reaction to a Proposed Offering of "Combined Network Management and Field Service—One-Stop Shopping for Network Design, Implementation, Operation, and Repair/Maintenance"

Exhibit II-16b

Knee-Jerk Reaction to a Proposed Offering of "Combined Network Management and Field Service—One-Stop Shopping for Network Design, Implementation, Operation, and Repair/Maintenance"

Positive Respondent Quotes:

- There's a Place for This but Not My Company
- I Want Pieces—Not Everything
- Depends on Specifics

Neutral Respondent Quotes:

- Untested Idea
- Would Try Pieces
- We're Too Big, Good for Smaller Shop
- Probably Good for Big Complex Shop, Not Our Simple One
- Interesting Idea, But Not Here

Negative Respondent Quotes:

- Unwilling to Give Up Control
- No One Can Do Everything Well!
- Hard to Sell; Need Isn't Great

Exhibit II-17

What Services Would You Consider/Not Consider Buying?

Would a TPM Field Service
Alone Be Sufficiently Attractive?

| | | |
|-------|----|-------|
| "Yes" | 24 | (75%) |
| "No" | 8 | (25%) |

*cut box
sig*

cut by size

Exhibit II-18

What Will It Take to Win Your Business?

The "Minimum" Field Service Must Cover:

| | |
|-------------------------------------|----------------|
| A. All Our Networks | 52% |
| Less Than All | 48% |
| B. Both Voice and Data | 68% |
| Data Only | 32% |
| C. All Network Equipment | 67% |
| Just Certain Items | 33% |
| D. Domestic U.S. plus International | 18% |
| Nationwide U.S. | 50% |
| Regional U.S. Only | 32% |
| E. Network-Related Equipment | (Unclear Need) |

Exhibit II-19

Proposed Service Perception Biases

A. Vendor Use of Alliances

| | | |
|-------------|----|-------|
| Favorable | 3 | (13%) |
| Unfavorable | 6 | (25%) |
| Neutral | 15 | (63%) |

B. Reaction to Foreign Ownership

| | | |
|-------------|----|-------|
| Favorable | 0 | (0%) |
| Unfavorable | 2 | (8%) |
| Neutral | 22 | (92%) |

C. Where Is the Market?

| | <u># Mentions</u> | |
|---|-------------------|--------------|
| Large Firms (Fortune 500/>\$500 M Sales) | 12 | (24%) |
| Medium Size (\$200-500 M Sales) | 21 | (42%) |
| Small Organizations (\$50-200 M) | <u>17</u> | <u>(34%)</u> |
| | 50 | (100%) |

do by size of firm

Exhibit II-20

The Acid Test

"In Exchange for Special Terms, Would You Be Interested in Becoming a Showcase Customer?"

| | | |
|-------|----|-----|
| Yes | 6 | 21% |
| No | 18 | 62% |
| Maybe | 5 | 17% |

II. Competitive Environment

1. Structure
2. Vendor Issues
3. Major Players
4. Specialists
5. Overviews of Twelve Supplier Types
6. Detailed Competitive Matrix

INPUT

Structure

- Highly Fragmented
- Many and Varied Players
- Major Players
- Specialists

INPUT

Vendor Issues

- Scope of Offering
- Product versus Service
- Voice versus Data
- Motives

INPUT

Major Players

- Computer Manufacturers
- Communications Equipment Manufacturers
- Telephone Companies
- Network Management Companies
- Shared Tenant Services Companies

Specialists

- Third-Party Maintenance Companies
- Shared Tenant Services Companies

INPUT

Competitive Environment— Computer Manufacturers

3. Purpose of Product and Service Overviews

- Review the current status of the U.S. private network markets
- Identify technology/product trends
- Note market direction
- Review competitive environment

Note: ^{all} Forecasts are desk research based

INPUT

Coverage

- Circuits
 - Leased Line
 - Dial-up Line
 - T-1 Systems
 - Satellite
- Value-Added Systems
 - Value-Added Network Service
 - Message
 - Electronic Data Interchange (EDI)
 - E-Mail
 - Facsimile
- Network Equipment
 - Modems
 - Multiplexers
 - Statistical
 - T-1
 - VSAT Terminals and Earth Stations
 - Microwave
 - Network Management Systems
- Network Related Equipment
 - Front-End Processor
 - Private Branch Exchanges (PBXs)
 - LANs
 - Telephone Key Sets
 - Personal Computers and Workstations
 - Dumb Terminals
- Miscellaneous/Other
 - Disaster Recovery

Private Line Network Categories

- Analog private lines—typically operate at 9.6Kbps but with special modems and conditioning can operate up to 19.2Kbps
- Digital Data Service (DDS) lines—can operate between 2.4Kbps and 56Kbps
- T-1 and T-3 lines—T-1 lines operate at 1.544Mbps and can be divided into 24, 64Kbps channels...T-3 operate at 45Mbps

INPUT

Private Line Network Carrier Revenues

| Rank and Vendor | 1987 Revenue (\$M) | 1987 Market Share (Percent) |
|------------------|--------------------------|-----------------------------------|
| 1. AT&T | 5,657 | 68 |
| 2. MCI | 748 | 9 |
| 3. US Sprint | 499 | 6 |
| 4. ITT/USTS | 141 | 2 |
| 5. Western Union | 133 | 2 |
| 6. Contel/ASC | 116 | 1 |
| 7. Allnet (ALC) | 75 | 1 |
| 8. All others | 951 | 11 |
| Total Market | 8,320 | 100 |

Dial-up Lines

- Offer the greatest flexibility
- Dominated by voice and lower-speed data
- \$55 billion in revenues
- Market dominated by AT&T

T-1 Technology

- Operated exclusively by AT&T and LECs since 1962
- First available to end users in 1977
- Substantially cheaper since first offering
- Useful as bulk-capacity transmission facilities
- Consolidates voice, data, and image
- Potential for local carrier bypass
- Market dominated by AT&T

T-1 Network Circuit Forecast

- 35% of Fortune 1000 companies will continue to use T-1.
- More than 400,000 T-1 lines should be in place by 1991.

Satellite Technology

- Reached its peak as primary medium for voice
- By mid-1990s, overall market share will level out
- Users selecting fiber optic technology over satellites
- Over-abundance of satellite capacity
- 65 domestic satellites in orbit, up to 30% decommissioned by 1993
- Replacement and insurance costs high after the shuttle disaster

Private Satellite Networks

VAN Technology

- VANs have two primary roles:
 - Providers of "virtual network" service gives users instant worldwide access
 - Direct sale of technology for private special-purpose networks
- Technology is packet-based
- Appropriate for "timesharing" applications
- Links dissimilar systems and devices

VAN Revenues

| Rank and Vendor | 1987 Revenue* (\$M) | 1987 Market Share (Percent) |
|------------------|---------------------------|-----------------------------------|
| 1. Telenet | 185 | 43 |
| 2. Tymnet | 170 | 40 |
| 3. INFONET | 30 | 7 |
| 4. GEIS | 20 | 5 |
| 5. IBM | 15 | 3 |
| 6. ITT WorldComm | 5 | 1 |
| 7. MCI | 2 | 1 |
| Total Market | 430 | 100 |

* Pure VAN network (transport) service, excluding application-based revenues

VAN Environment

1. Leading Vendors: (Tymnet and Telenet)

- Public services are transport-oriented
- Have worldwide coverage via gateways to other countries
- Also sell private packet networks
- Will try to expand breadth of transport services with marginal success

VAN Environment

2. Smaller Vendors: (CSC, INFONET, GEIS, and IBM)
 - Emphasize application-based services
 - Also have substantial international coverage
 - Could be "sleepers" regarding broader telecommunications offerings—especially CSC and IBM

INPUT

Message Technology

- Originated in the 1930s and peaked in 1960s
- Provides “dial-up” hard-copy electronic messaging
- Now on irreversible path of decline due to E-Mail and Facsimile
- \$500 million in today’s market, decreasing to \$410 million by 1991

Message Revenues

| Rank and Vendor | 1988 Revenue (\$M) | 1988 Market Share (Percent) |
|-----------------|--------------------------|-----------------------------------|
| 1. WUTCO | 300 | 60 |
| 2. MCI | 160 | 32 |
| 3. TRT | 40 | 8 |
| Total Market | 500 | 100 |

Electronic Data Interchange Technology

- Market is composed of two major industries:
 - Electronic Mail (E-Mail)
 - Facsimile (FAX)
- Both industries contributing to demise of Telex
- E-Mail is terminal-to-terminal transmission of text messages
- X.400 standard allows various E-Mail vendors to talk to each other

E-Mail Revenues

| Rank and Vendor | 1987 Revenue* (\$M) | 1987 Market Share (Percent) |
|---------------------|---------------------------|-----------------------------------|
| 1. Western Union | 140 | 35 |
| 2. US Sprint | 60 | 15 |
| 3. MCI Mail | 48 | 12 |
| 4. General Electric | 36 | 9 |
| 5. British Telecom | 32 | 8 |
| 6. Others | 84 | 21 |
| Total Market | 400 | 100 |

* Revenues include host & PC software

INPUT

E-Mail Network Services Forecast

E-Mail Network Services Forecast

- 800,000 subscribers in 1987—projections suggest 2.7 million by 1992.
- E-Mail pricing will continue to decline.
- Other message mediums such as facsimile and voice mail will erode E-Mail's overall market share from 48% in 1987 to 30% in 1995.

INPUT

Facsimile Technology

- Scans text and graphics and sends over regular dial-up lines
- First faxes appeared in late 1960s
- Group 3 CCITT adopted standards in 1983
- Transmission speed now 10 to 30 seconds per page

Facsimile Technology

- Unit prices have dropped from \$20,000 to under \$1,000
- Unit sales doubled to 465,000 in 1987
- Half the phone traffic between Japan and U.S. is facsimile

Facsimile Equipment Revenues

| Rank and Vendor | 1987 Revenue (\$M) | 1987 Market Share (Percent) |
|-----------------|--------------------------|-----------------------------------|
| 1. Sharp Elect. | 98 | 14 |
| 2. Ricoh Corp. | 84 | 12 |
| 3. Canon USA | 70 | 10 |
| 4. Pitney Bowes | 57 | 8 |
| 5. NEC America | 56 | 8 |
| 6. Panafax | 55 | 8 |
| 7. Harris/3M | 49 | 7 |
| 8. Xerox Corp. | 48 | 7 |
| 9. Telautograph | 38 | 5 |
| 10. Murata | 31 | 4 |
| 11. Other | 114 | 17 |
| Total Market | 700 | 100 |

Electronic Messaging Systems Forecast

INPUT

ISDN Technology

- Integrated Services Digital Network provides environment for end-to-end flow of digital voice and data signals between user sites

Some of the features include:

- Common connections for voice, data, and video
- No special interfaces
- No modems
- Speed unlimited by conversions of any kind
- Multipoint and data conference calls from any telephone
- Digital handsets display caller and called parties and E-Mail capabilities

ISDN Equipment Forecast

ISDN Equipment Forecast

- PBX's make up 75% or \$3.4 billion of the current market
- By 1991, PBX's will have less share of the market but still account for \$4.4 billion
- In 1990, digital handsets will have \$740 million value and feature-heavy telephones will account for \$1.2 billion
- ISDN-related services will be at \$1.5 billion in 1991

ISDN Equipment Forecast

- By 1991, 69 U.S. central offices will have been converted to a local digital loop
- Full market “lift-off” will occur from 1992 to 1996
- Today’s T-1 multiplexer manufacturers are already in demand and may be in the best position for ISDN network management

Modem Technology

- Modems translate a computer's digital signals into analog signals for transmission along analog telephone lines
- Modem market is fairly stable
- No changes in the top 12 vendors
- The same 12 have over 75% of the market

lyse?

Modem Equipment Revenues

| Rank and Vendor | 1987 Revenue (\$M) | 1987 Market Share (Percent) |
|---------------------|--------------------------|-----------------------------------|
| 1. AT&T | 2,189 | 19.9 |
| 2. Codex (Motorola) | 126 | 11.5 |
| 3. UDS (Motorola) | 107 | 9.6 |
| 4. Paradyne (AT&T) | 107 | 9.6 |
| 5. GDC | 103 | 9.4 |
| 6. Racal-Milgo | 89 | 8.1 |
| 7. Racal-Vadic | 51 | 4.6 |
| 8. Case | 41 | 3.7 |
| 9. Concord Data | 25 | 2.3 |
| 10. IBM | 22 | 2.0 |
| 11. Hayes | 19 | 1.7 |
| 12. Others | 194 | 17.6 |
| Total Market | 1,100 | 100.0 |

- Modem prices have come down to about one-third of 1970's costs
- Sales are will drop off in the mid-1990's due to ISDN

INPUT

Modem Sales Forecast

- Modem sales will peak at \$1.3 billion in 1989
- Modem sales will decrease \$940 million in 1992 as a result of the ISDN influence

Multiplexer Technology

- The multiplexer (mux) market can be divided into 2 areas:
 - Statistical (sub T-1) muxes
 - T-1 muxes
- Stat mux market is increasing from \$1.4 billion in 1987 to \$7.2 billion by 1992.

INPUT

Multiplexer Technology

- Stat mux vendors are about the same as the T-1 vendors except Codex and Racal Milgo, which rank in first place.
- T-1 muxes operate at 1.544 Mbps and can transmit multiple voice, data, and limited video.
- The T-1 mux providers may be the ones that most effectively manage the networks of the 1990s.

T-1 Multiplexer Market Revenues

| Rank and Vendor | | 1988 Revenue (\$M) | 1988 Market Share (Percent) |
|-----------------|------------------|--------------------------|-----------------------------------|
| 1 | Timplex/Unisys | 109 | 24 |
| 2 | N.E.T./IBM | 96 | 21 |
| 3 | DCA/Cohesive | 36 | 8 |
| 4 | General DataComm | 32 | 7 |
| 5 | AT&T/Tellabs | 32 | 7 |
| 6 | Stratacom | 23 | 5 |
| 7 | Avanti | 18 | 4 |
| 8 | Infotron | 14 | 3 |
| 9 | Others* | 95 | 21 |
| Total Market | | 455 | 100 |

* Others include Codex/Motorola and Racal-Milgo

INPUT

T-1 Multiplexer Forecast

T-1 Multiplexer Forecast

- Annual growth rate will continue through 1992 at more than 20%, reaching \$1 billion including market saturation and ISDN influence
- More than 400,000 T-1 lines should be in place by 1991
- More than 35% of the Fortune 1000 will continue to use T-1

VSAT Terminal and Earth Station Technology

- Very Small Aperture Terminals are evolving into multifeatured systems with significant capabilities at reasonable costs.
- End users now have much more control over performance, cost, and flexibility.
- Users have complete independence from traditional long-distance and local exchange facilities.

VSAT Terminal and Earth Station Technology

- Technology has expanded from one-way to two-way applications in retail, hotel, hospitals, airlines, pipelines, and data processing industries.
- VSAT market will grow 20% per year—from 10,000 terminals in 1987 to 100,000 by 1991.
- Total VSAT market will progress from \$300 million to \$500 million by 1990.
- Top 3 vendors (Hughes, Contel ASC, and GTE) have 75% of market.

Private Satellite Network Market Forecast

INPUT

Microwave Technology

- Short-haul digital microwave solves transmission/ connectivity problems for end users.
- Numerous applications include carrier bypass, access links from L.D. carriers, LAN bridges, and emergency backup.
- The private microwave market is on the rise.

Microwave Technology

- The total 1988 digital microwave market is \$405 million and will decline to \$350 million by 1992.
- The short-haul private digital market is currently \$50 million and will increase to \$90 million by 1992.

INPUT

Private Microwave Market Revenues

| Rank and Vendor | | 1988 Revenue (\$M) | 1988 Market Share (Percent) |
|-----------------|-------------------|--------------------------|-----------------------------------|
| 1 | Digital Microwave | 12 | 24 |
| 2 | NEC America | 9 | 18 |
| 3 | Farinon/Harris | 7 | 14 |
| 4 | Ericson | 6 | 11 |
| 5 | Hughes | 5 | 10 |
| 6 | Other | 11 | 23 |
| Total Market | | 50 | 100 |

Network Management Classifications

- Communications Test Equipment Specialists
- Modem and Multiplexer Manufacturers
- Network Management System Integrators

↳ Classify by product types
rather than source of product
(eg prod v. service)

Communications Test Equipment Technology

- Systems divided into manual and automated network test systems
- Combination of hardware and software diagnostic components and ancillary devices
- Vendors include Atlantic Research Corporation, Hekimian Laboratories, Inc., and Dynatech Data Systems

Modem and Multiplexer Manufacturer Technology

- Combination of integrated hardware and software diagnostic components
- Operates by augmenting modems with integrated intelligent test modules
- Systems allow the network technician to monitor all points and paths in the network, including modems, lines, and terminal equipment

INPUT

Modem and Multiplexer Manufacturer Technology

- Performs diagnostic testing on network components and rapidly isolates problem areas
- Also performs administrative management, including circuit design, trouble tickets, etc.
- Vendors include Codex, Racal Milgo, and Paradyne

Network Management System Integrator Technology

- Includes the integration of Communications Test Equipment Specialists and Modem and Multiplexer Manufacturers
- Monitors all alarm messages from all network management/ diagnostic devices, strips off superfluous data, and presents status of all network components
- Vendors include Avant-Garde Computing, Inc., IBM, and Cincom Systems, Inc.

INPUT

Network Management Market Segments

Using a broad definition of network management, there are over 60 vendors in the field which generated \$640 million in 1987 and over \$700 million in 1988.

Network Management Market Segments

The 1987 market can be broken into five market segments:

| | |
|--|--------|
| • Data comm network management equipment | \$200M |
| • Integrated software-oriented products | 174M |
| • Switched telephone network equipment | 115M |
| • Data comm matrix switches | 100M |
| • T-1 network management equipment | 51M |
| Total Market | \$640M |

INPUT

Network Management Market Revenues

Of the more than 60 vendors in the network management arena, INPUT estimates that the following companies are major players in the market:

need a mkt fest

Network Management Market Revenues

Vendor

| Rank and Vendor | 1987 Revenue (\$M) | 1987 Market Share (Percent) |
|------------------------------|--------------------------|-----------------------------------|
| 1. Atlantic Research | 38 | 6 |
| 2. Hekimian Laboratories | 37 | 6 |
| 3. Dynatech Data Systems | 35 | 5 |
| 4. IBM | 27 | 4 |
| 5. Bytex Corporation | 25 | 4 |
| 6. Keptel Inc. | 22 | 3 |
| 7. Morino Associates | 22 | 3 |
| 8. Avante-Garde Computing | 20 | 3 |

INPUT

Front-End Processor (FEP) Manufacturers

FEP market was \$1.11 billion in 1987.

FEP manufacturers are:

| <u>Vendor</u> | <u>Market Share</u> |
|-----------------|---------------------|
| IBM | Dominant |
| DEC | |
| Amdahl | |
| NCR/Comten | |
| Hewlett-Packard | |
| Tandem | |

PBX Market Classification

As of 1987, the PBX market breakdown was:

| | |
|-----------|---------|
| PBX Voice | \$3.10B |
|-----------|---------|

| | |
|----------|---------|
| PBX Data | \$.98B |
|----------|---------|

| | |
|----------------|---------|
| PBX Voice/Data | \$.90B |
|----------------|---------|

| | |
|--------------|---------|
| Total Market | \$4.98B |
|--------------|---------|

PBX Market Classification

- The voice-only market should decrease by as much as 15% through 1991.
- The data-only PBX market should stay fairly flat.
- The voice and data PBX market should increase at about 22% per year and reach \$2.4 billion by 1992.

PBX Market Revenues

| Rank and Vendor | | 1988 Revenue (\$B) | 1988 Market Share (Percent) |
|-----------------|------------------|--------------------------|-----------------------------------|
| 1 | AT&T | 1.44 | 29 |
| 2 | Rolm/Siemens | 1.34 | 27 |
| 3 | Northern Telecom | 1.00 | 20 |
| 4 | NEC | .50 | 10 |
| 5 | Mitel | .25 | 5 |
| 6 | Fujitsu/GTE | .15 | 3 |
| 7 | Intecom | .05 | 1 |
| 8 | All Others | .25 | 5 |
| Total | | 4.98 | 100 |

INPUT

LAN Market Growth

- The current LAN market is \$1.7 billion.
- The computer networking market is expected to grow at about 35% per year over the next three years.
- 58% of all personal computers will be networked by 1991.
- The market is estimated to exceed \$4 billion by 1991.

LAN Market Revenues

| Rank and Vendor | 1988 Revenue (\$M) | 1988 Market Share (Percent) |
|--------------------------|--------------------------|-----------------------------------|
| 1. DEC | 320 | 19 |
| 2. IBM | 240 | 14 |
| 3. 3Com | 200 | 12 |
| 4. Novell | 150 | 9 |
| 5. Ungermann-Bass | 90 | 5 |
| 6. Apple | 90 | 5 |
| 7. Sytek | 50 | 3 |
| 8. AT&T | 50 | 3 |
| 9. Standard Microsystems | 30 | 2 |
| 10. Proteon | 30 | 2 |
| 11. All Others | 450 | 26 |
| Total | 1,700 | 100 |

INPUT

PC Market Revenues

| Rank and Vendor | 1988 Revenue (\$B) | 1988 Market Share (Percent) |
|-----------------|--------------------------|-----------------------------------|
| 1. IBM | 5.79 | 19.3 |
| 2. Apple | 3.75 | 12.5 |
| 3. Commodore | 1.95 | 6.5 |
| 4. Tandy | 1.89 | 6.3 |
| 5. Atari | 1.38 | 4.6 |
| 6. Compaq | 1.11 | 3.7 |
| 7. AST | .18 | 0.6 |
| 11. All Others | 13.95 | 46.5 |
| Total | 30.00 | 100.0 |

PC Market Forecast

Microcomputer Workstations Market Revenues

| Rank and Vendor | | 1988 Revenue (\$M) | 1988 Market Share (Percent) |
|-----------------|------------|--------------------------|-----------------------------------|
| 1 | Apollo | 970 | 36 |
| 2 | Sun | 810 | 30 |
| 3 | H-P | 430 | 16 |
| 4 | DEC | 220 | 8 |
| 5 | All Others | 270 | 10 |
| Total | | 2,700 | 100 |

Disaster Recovery Technology

- Business appears to be a promising service area.
- Corporations pay a regular fee for guaranteed space on a backup computer.
- Service is interlinked with a telecommunications disaster recovery plan.

Disaster Recovery Technology

- Revenues estimated to be \$150 million.
- Market comprises only 10% of the potential pool of customers.

Disaster Recovery Market Revenues

| Rank and Vendor | | 1988 Revenue (\$M) | 1988 Market Share (Percent) |
|-----------------|-------------------------|--------------------------|-----------------------------------|
| 1 | SunGard Data Systems | 60 | 40 |
| 2 | Comdisco | 60 | 40 |
| 3 | All Others | 40 | 20 |
| Total | | 160 | 100 |

MARKETPLACE

- Discounting of Hardware Leads to Discounting Service
- Systems Integration Leads to Multivendor Service/Support
- Users Releasing RFPs for Service
- TPMs Very Active
- Sellers to Buyers Market
- Special Bids/Let's Make a Deal!

STRATEGIC IMPLICATIONS OVERALL

- Reduced revenue and profit opportunities for base maintenance
 - 1st — Service of IBM products
 - Followed by — Service of all vendors' products
- Total cost of ownership reduced
 - 1st — IBM products
 - Followed by — All vendors' products
- User equity will emerge as a key issue as market changes from seller's to buyer's
- Key objective of hardware, software, and service vendors should be high availability at lowest cost
- Service offerings will broaden to cover everything a customer needs to achieve high availability at lowest cost
- Cost pressures and economies of scale will result in more mergers and acquisitions

—INPUT—

STRATEGIC IMPLICATIONS—VENDORS' FOCUS ITEMS

Hardware Product Managers

- Account Control

- Total Cost of Ownership (New Products)

- High Availability

- Third-Party Entry

Software Product Managers

- Improved Training, Documentation, On-Site Support

Service Operational Management

- Customers' Total Needs vs. Service Delivered

- Marketing of Service

- Cost of Service

Service Business Managers

- Equity

- Third-Party Entry

- VAR/VAD Support

- Third-Party Support

- Broadened Offerings

 - Multivendor

 - Network Management

 - Ancillary Services

INPUT

STRATEGIC IMPLICATIONS—TPMs FOCUS ITEMS

- Reduced Margins Will Result in More Mergers/Acquisitions
- Sophisticated Support Will Be Required to Achieve High Availability at Lowest Cost
 - Remote Support
 - Parts Logistics
- Vendor Support Will Decrease, Prices Will Increase
- Key Strengths Will Be Full Multivendor Support and Level of Service
- Price Differential with Vendors Will Decrease

INPUT

IBM Telecommunications-Services Network Support

- Announced 9/88
- Assists customer in network management effort
- Applies to voice, data, and integrated voice/data networks
- Provides network problem determination and coordination assistance to customer call screening facility (helpdesk)
- IBM Network Support center available 24 hours/day
- Advanced network monitoring and diagnostic tools
- Network monitors and remote test computers installed when required
- Service management option available where IBM takes full responsibility for hardware service from all vendors

Telecommunication Services, Network Support

IBM

5 Required Product Support

- All Network Products Except Common Carriers
- End User Products (Terminals, W/S)
- Remote Network Management and Technical Support Skills
- Customer Network Data Base System
- Proprietary Network Management Software and/or Skill on Major Software Products (e.g., Netview)

Market Forecast Status

1. Desk Research Has Yielded a Wide Range of Uncomparable/Unintegrated Forecasts

- Unclear Assumptions and Coverage
- Unclear Definition of Terms

2. Comparison of "Top Down" Market Forecast with "Bottom UP" Forecasts in the Product and Service Overview Section May Raise More Questions than Answers

3. Primary Market Conclusions:

- Today it's an In-House Market
- The Outside "Available" Market Barely Exists and Is Very Fragmented
- Opportunity is to Develop Latent Potential
- Market Profile
 - Type of Service
 - Size of Firm
 - Vertical (Industry)
- Data Center Facility Management Is Model for "Full Telecom Services"

A 8 - 14B familiar

total Maint V.T PM

"order of magnitude best in class" + & -

B. Show telecom T PM isn't big enough alone to sup a viable bus.

• Vendor size
• nationwide network

C. Fast industry evolution?
(assumption behind best & risks)

7. Recommendation to Reposition Report Topics

REQUIRED PRODUCT SUPPORT - An assessment of which of the products defined above it will be necessary to maintain to succeed in setting up a major third party telecommunications field service organization in the U.S. Also an assessment of the communications services it will be necessary to support for the network management portions of the U.S. BTI organization.

CUSTOMER AND VENDOR REQUIREMENTS DEFINITION - Requirements for network management organizations which provide both network management services and third party field services for network equipment in the U.S.

From the customer viewpoint what must be provided in terms of services and coverage (geographical, network equipment, and network services).

From the vendor (operational) perspective what is necessary to both manage networks and maintain network equipment.

Combine the Two Separate Discussion above into a Single Section Called:

BTI Business Model

1. Success Requirements:

- Products/Services
- Pricing
- Marketing/Promotion
- Distribution Channels

• Operational

2. Emphasis more on Strategic than Tactical Issues
(Service Offering vs. "Help Desk" Requirements)

3. Other Issues, e.g., Unions

Proforma P&L

risks - best forecast case

→ eg OEM price cuts

III. BTI Strategy Options (Preliminary)

1. BTI U.S. Market Objectives
2. BTI Strengths and Weakness regarding U.S. market penetration
3. Strategy Scenario A
4. Strategy Scenario B
5. Strategy Scenario C

BTI U.S. Private Network Market Objectives

1. Third-party service offerings only—no interest in reselling network facilities
2. Rapid market penetration—major player within two years
3. Buy in-place capabilities rather than build new organizations from the ground up

Strategic Choice

Major Player

vs.

Niche Player

What: Broad Service/
one-stop-shop

Limited Product Line

| Large Revenues | | Smaller Revenues | |
|--------------------------------|----------------------------|-----------------------|---|
| Pros | Cons | Pros | Cons |
| 1. Sufficient Corporate Impact | 1. Longer Time to Achieve | 1. Shorter Time | 1. Not Big Enough to Make a Differences |
| | 2. Bigger Investment | 2. Smaller Investment | |
| | 3. More Fierce Competition | 3. Less Risk | |
| | 4. Bigger Risks | 4. Less Competiton | |

INPUT

BTI U.S. Market Assessment

| Strengths | Weaknesses |
|--------------------------|---|
| 1. Telecom image | 1. No established launching platform |
| 2. Specialized expertise | <i>not imp</i> <i>give to provide brochures etc.</i> |
| 3. Financial strength | |
| 4. Global "connections" | |

BTI Strategy: Scenario A

Driving Principle: Target "Hot" Market Needs

| Strategy | Implementation |
|--|---|
| Step 1: Acquire a Nationwide Field Service capability | Some Interesting Candidates |
| Step 2: Acquire an NMS capability <ul style="list-style-type: none"> • Product • Service | Avant-Garde <ul style="list-style-type: none"> • Image • AI work • Weak financially • Available |
| Step 3: Flesh out field service coverages (product and geography) by both acquisition and alliances | Long Shopping List |

has UK market agreement w/ BTI

INPUT

BTI Strategy: Scenario B

Driving Principle: Target Industry (Vendor Side)
Opportunities

| Strategy | Implementation |
|--|---|
| <p>files in face of being (1) Multi-vendor (2) Ad hoc, not a service - hard to explain</p> <p>Step 1: Acquire a modem company</p> <ul style="list-style-type: none"> • Customer base • Field service organization | <ul style="list-style-type: none"> • Declining future • Several available |
| <p>describe ATT/Poddyne motives give rationale of modem business paying for BTI foothold in U.S.</p> <p>Step 2: Acquire T-1 equipment company</p> <ul style="list-style-type: none"> • Netwide visibility • High growth area • Strategic position • Might pick up NMS system <p>distracted of T-1 equip biz (per cons)</p> | <ul style="list-style-type: none"> • Expensive • N.E.T./IBM relationship |
| <p>Step 3: Flesh out capabilities via acquisition and alliances</p> <ul style="list-style-type: none"> • NMS capability • Field service coverage (products and geography) | <p>Many</p> |

INPUT

BTI Strategy: Scenario C Concept Level Only

Driving Principle: Path of Least Resistance, Stealth and a
Global Perspective

| Strategy | Implementation |
|--|-----------------|
| Position BTI as full-service supporter of the international portion of (everyone's) networks | this is a given |
| Logically evolves into full-service capability for all domestic nets as well | |

Builds:

- Credibility
- Strong differentiating factor
- Sell new level of foreign (ie US) network support to other continents

EXAMPLE

COMPANY PROFILE

Avant-Garde Computing, Inc.
8000 Commerce Parkway
Mt. Laurel, New Jersey 08054-2227
(609) 778-7000

Timothy P. Ahlstrom, President, Chairman, & CEO
F. Morgan Lamarche, Vice Chairman, Secretary, & Director
Public Corporation: NASDAQ
Total Employees: 147
Fiscal Year End: 4/30/88
Total Revenue: \$16,733,000
Operating Income: (\$2,663,000)

The Company

Avant-Garde Computing, Inc. (AGC), organized in 1978, designs, produces, sells, and supports integrated software-based systems which are used to help manage large data and voice communications networks. These products are based on proprietary software which utilize minicomputers, microprocessors, and real-time graphics to support the management of networks. These tools help network managers improve service, control costs, manage operations, analyze performance, and plan for the future growth of the networks.

The company has reduced its total number of employees by 15% during 1987 and 1988. In keeping with its reorganization plan, it has redistributed its employees into various divisions.

| <u>Division</u> | <u>Employees 1988</u> | <u>Employees 1987</u> | <u>% Change</u> |
|-----------------------------|-----------------------|-----------------------|-----------------|
| Marketing | 9 | 7 | 22% |
| Sales, Customer Support | 59 | 49 | 17% |
| Engineering (R&D) | 42 | 51 | (18%) |
| Management & Administration | 21 | 21 | N/C |
| Operation & Production | <u>16</u> | <u>45</u> | <u>(64%)</u> |
| Employee Totals | 147 | 173 | (15%) |

The company sells its products primarily to organizations which operate large data communications networks. These organizations have several large computers which are installed in one or more sites. AGC's customers include insurance companies, major banks, telephone companies, government agencies, and other large users in the U. S., Canada, and Western Europe.

As of April 1988, AGC had sold 183 Net/Alert and Net/Alert Plus systems, 17 Net/Guard systems, and 4 Net/Command systems. Some customers purchased more than one system. The company sold 31 Net/Alert systems and 1 Net/Guard system in 1988.

The company's major products are:

- Net/Alert Plus (replaces Net/Alert) is a data network performance monitoring system which provides current and historical network status, performance, utilization, and availability information data communications network staff.
- Net Command allows operators of large networks to manage and control a number of network and host-computer monitoring, management, and diagnostic products from a single workstation.
- Net/Guard is a stand alone system which provides security and management for dial-up networks by controlling access from various terminal devices.

In May 1986, AGC signed a definitive agreement with British Telecom (BT), the major telephone company in the United Kingdom, granting them exclusive U. K. distribution rights for all of AVG's products. In 1987, BT established a separate organization within BT to sell AGC's products. This action was the result of BT's resale of seven Net/Alert products.

Avant-Garde Computing, Inc., announced in August 1988 that they had reached an agreement in principal for a major distribution and support arrangement with Concurrent Computer Corporation (CCC). CCC would distribute and support AGC equipment and services in Australia, New Zealand, other Asian countries including Japan, Canada, and the U.S. Government.

Company Strategy

Avant-Garde Computing, Inc., has undergone a restructuring in 1987 and 1988 in an effort to improve margins and to become profitable. The company has abandoned the development of several new products and now focuses on major enhancements to their more popular product, Net/Alert Plus and Net/Command.

The company also instituted a formal quality control program in 1987 to lend further support its significant repeat customer base.

In addition, the company has reduced its total employees by 15%, primarily in Engineering and Operations.

Financial Summary

Total fiscal 1988 revenues (fiscal year ending April 30) reached

\$16.7 million, a 4% decrease under fiscal 1987 revenues of \$17.3 million. Net income decreased by 64%, from (\$6.4) million in fiscal 1987 to (\$2.3) million in fiscal 1988. A five year financial summary follows:

Avant-Garde Computing, Inc.
Five Year Financial Summary
(\$ thousands, except per share data)

| ITEM | 1988 | 1987 | 1986 | 1985 | 1984 |
|--|-----------|-----------|-----------|----------|----------|
| Revenue | \$16,733 | \$17,358 | \$16,309 | \$20,437 | \$16,529 |
| * % increase (decrease) from previous year | (04%) | 06% | (25%) | 24% | -- |
| Operating income (loss) | (\$2,663) | (\$6,772) | (\$6,301) | \$ 176 | \$1,876 |
| * % increase (decrease) from previous year | 61% | (07%) | (-%) | (91%) | -- |
| Net income (loss) | (\$2,332) | (\$6,427) | (\$5,154) | \$ 875 | \$1,434 |
| * % increase (decrease) from previous year | 64% | (25%) | (-%) | (39%) | -- |
| Earnings per share | (\$.62) | (\$1.71) | (\$1.40) | \$0.24 | \$0.47 |
| * % increase (decrease) from previous year | 64% | (22%) | (-%) | (49%) | -- |

The company attributes a majority of its decrease of over \$1 million in revenues to fewer sales of its Net/Alert product. AGC believes that this reduction is attributable to an increase in voice and data network complexity on high-speed (T-1) lines. This, coupled with marketplace confusion due to increased competition contributed to the decline in sales from fiscal 1987.

The Net/Command product generated \$215,000 in 1988 reflecting introductory pricing.

Only one new Net/Guard system was sold (\$167,000) during the same period. Total 1987 revenues for the Net/Guard product were \$1.9 million, of which 72% was generated by a single customer.

System and upgrade sales in Western Europe increased by 29% to \$4.2 million in 1988 from \$3.0 million in fiscal 1987.

Total costs of sales in 1988 increased as a percentage of net

revenue to 56% from 53% in 1987.

Sales and marketing expenses for fiscal 1988 decreased 28% from 1987. As a percent of net revenues, sales and marketing costs decreased from 45% in fiscal 1986 to 37% and 27% in fiscal 1987 and 1988, respectively. The reductions were the result of reductions in compensation costs, promotional activities, reallocations of sales expenses to service expenses, and staff reductions.

General and administrative costs decreased \$719,000 from fiscal 1987 and decreased as a percentage of net revenues from 20% to 17%.

Research and development costs for software and product development were \$2.5 million in 1988, \$3.7 million in 1987, and \$3.8 million in 1986.

Litigation

Avant-Garde Computing, Inc., is in the process of defending itself against two suits which were brought against the company in 1985. One alleges company misrepresentation and the other alleges that the company failed to disclose certain information. While AGC believes that the ultimate resolution of these cases will not affect the financial position of the company, they intend to pursue a vigorous defense. The company provided \$100,000 in 1988 and \$700,000 in 1987 to defend these cases.

Key Products

AGC's key products are based on proprietary software. These products utilize minicomputers, microprocessors, and real-time color graphics to assist network managers improve service, manage operations, analyze performance, control costs, and plan the growth of their networks.

- * Net/Alert Plus is the company's principal revenue producing product in fiscal 1988. It is a data network performance monitoring system which represents a major revision of the initial network monitoring product, Net/Alert. The new product offers enhanced graphics through a PC work station, and also provides new reports and features. It provides a real-time monitor of the status, performance, availability, and utilization of leased line networks.
- * Net/Command, the newest product, is an integrated multi-vendor network management system. It is a software-based system which allows operators of large data communications networks to control a number of network and host-computer monitoring, management, and diagnostic products from a single network workstation.
- * Net/Guard is a stand-alone system which provides security

and management of dial-up networks. Network managers can secure and control access of personal computers and other dial-up devices to the central network, databases, and computers. Concurrently, the product monitors the status, performance, utilization, and availability of the dial-up network.

Industry Markets

SOURCE OF REVENUE SUMMARY

| RANKING ORDER | INDUSTRY | PERCENT OF GIVEN MARKET |
|------------------|--------------------------------|----------------------------|
| 1 | Manufacturing & Production | 28% |
| 2 | Diversified Financial Services | 20% |
| 3 | Utilities & Communications | 18% |
| 4 | Commercial Banks & Thrifts | 15% |
| 5 | Government & Defense | 12% |
| 6 | Transportation | 03% |
| 7 | Retailing | 02% |
| 7 | Other | 02% |

Market Share/Competition

The integrated software network management market represented about \$175 million in 1988, and is expected to grow to \$210 million in 1990. The market growth rate is increasing at about 10% per year. AGC had about 10% of the market in 1988.

The companies that appear to be in the best position to gain significant market share in the large-scale network management arena are those that sell T-1 equipment and associated network management systems.

The data and voice network management industry is highly competitive and includes such major players as IBM and AT&T. These players have stronger financial, marketing, and technical resources. AGC will encounter additional competition from these companies as well as from new entrants.

Principal competitive factors include product performance, reliability, upgrade capabilities, adaptability to a wide range of communications environments, service, customer support, and price.

To date, AGC has been able to compete through superior features; however, the company had to lower its price in late 1986 to meet significant price competition. Increases in competition may cause further price erosion.

APPENDIX A SERVICES PROFILE

AGC's customer support has its own field sales and support staff as well as those provided by British Telecom, Concurrent Computer Corporation, and its other European distributors. The company maintains a field service organization and a hot-line for easy access to support staff. Hands-on training is also available.
